News Release

For Immediate Release November 29, 2018

HTC Purenergy Inc. (dba "HTC Purenergy") announces unaudited condensed consolidated financial results for the third quarter period ending September 30th, 2018

Regina, Saskatchewan - ***HTC Purenergy*** **(HTC: TSX-V)** (the "**Corporation**" and/or "**HTC**") today announced its unaudited condensed consolidated financial results for the third quarter period ending September 30th, 2018 (the "**Quarter**" or the "**Period**").

HTC is an Environmental Energy Technology Development Company with subsidiary operations in Agricultural Storage & Handling. The acceptance of climate change and the social license that corporations are moving towards, are upon us in force. Carbon footprint and the capture and management of CO_2 has become effectively a currency of business, a vehicle for penalty and taxation, and a statement to shareholders who expect environmental responsibility from the companies they invest in. **HTC** notes as well, that all segments of the energy sector must contribute and as such, the management of CO_2 from combustion-fired plants can be used not only to reduce emissions, but also to improve oil production, through the use of enhanced oil recovery ("**EOR**") techniques. **HTC** has focused its efforts in this area over the past few years, as EOR provides an immediate economic benefit to an oil company, in addition to being able to meet its social license responsibilities.

The natural gas industry has taken on a new challenge of gas cleanup of CO_2, SO2 and other contaminants, while ensuring that the solvents and the glycols that are used in the clean-up process are recycled and reused, while at the same time providing a significant cost reduction to the customer.

HTC's Delta Purification Division is showing promising results, as the energy industry and many larger Industrial companies have joined the ***re3*** revolution: ***reclaim, recycle, reuse.***

The tertiary oil production business requires a significant amount of water for production of steam and at the same time a significant capital cost to install traditional heavy oil production technologies. The Assist "SCV" technology allows the use of brackish production water, that normally would have to be disposed of or treated, to be used as steam for energy production. The SCV technology also allows the heavy oil producer to bring existing non-producing wells back online, with a minimal investment in capital costs.

"Reclaim, Recycle, Reuse" is more than a tag line for our company, *WE ARE WORLD LEADERS* delivering technology in this solvent and glycol sector. Please read in more detail below, the exciting environmental technologies our company is now making a reality.

Financial Results
Selected financial information of HTC is summarized below. Information provided in the following table is prepared in accordance with IFRS.

	9 Month Period Ending Sept. 30, 2018	9 Month Period Ending Sept. 30, 2017
Revenue	$1,309,271	$257,175
Expenses	$3,356,048	$2,561,727
Net Income (Loss)	$(1,763,619)	$3,000,816
Comprehensive Income (Loss)	$(1,853,707)	$2,859,005
Common Shares outstanding	32,413,741	30,309,195
Weighted Average Shares Outstanding - Basic	32,190,181	30,309,195
Weighted Average Shares Outstanding - Diluted	33,180,889	32,149,361
Profit (Loss) per Common Share (weighted average) * see commentary below	$(0.05)	$0.07
Profit (Loss) per share on continuing operations	$(0.05)	$0.07

**Diluted net loss per common share is not presented, when the effect would be anti-dilutive.*

	9 Month Period Ending Sept. 30, 2018	Year Ending December 31, 2017
Total Assets	$34,032,863	$27,222,061
Current Liabilities	$1,978,764	$1,584,236
Long Term Liabilities	$8,135,740	$56,672

For the Period, the Corporation had operating revenue of $1,309,271 (September 30, 2017 - $257,175). Revenues are primarily due to new operations in Port LaJord Terminal Corp. (“**PLT**”) and **HTC** operations.

Expenses are comprised of the following:
Cost of sales for the Period is $772,764 (September 30, 2017 - $102,837). $451,725 relates to sales of fertilizer related materials and supplies, and $321,039 relates to increased operations and inventory sales in **PLT**.

Commercialization, product development and administrative expenses for the Period were $2,029,701 as compared to $2,157,079 as at September 30, 2017, reflecting a decrease of $127,378. The Period reflects decreased expenses resulting from fewer administration expenses.

Amortization for the Period reported was $432,262 (September 30, 2017 – $278,829). The increase in amortization is relating to capital additions. The **PLT** Fertilizer Storage facility was completed April 30, 2018. Amortization commenced May 1, 2018. The **PLT** Grain Storage Handling facility is currently in the development phase. Operations are expected to commence in December 2018, subject to project completion, at which time amortization will commence.

Finance expenses realized during the Period was $121,321 (September 30, 2017 - $7,232). The increase is a result of increased loans in **Maxx Group of Companies Corp.** and its subsidiaries (together the “**Maxx Group”)**.

The Corporation had an operating loss at September 30, 2018 of $(2,036,297) as compared to $(2,191,454) for the period ending September 30, 2017, reflecting a net change of $155,157. The change in operating loss reflects an increase which is primarily due to incomes in **PLT** and subsidiary.

Net Loss for the Period was $(1,763,619) compared to $3,000,816 as at September 30, 2017.

Comprehensive Income (Loss) includes the unrealized gains and losses on investments classified as available for sale of $(90,088) (September 30, 2017 – $(141,811)) and represents the net change in the carrying value of the investments to the quoted value and transfer of impaired investments to the Consolidated Statement of Loss. These adjustments do not involve cash.

Comprehensive Loss for the Period is $(1,853,707) compared to Comprehensive Income of $2,859,005 at September 30, 2017. The increase in loss is attributable to net income and the change in unrealized gain on investments classified as available for sale described above.

Total Assets for the Period were $34,032,863 compared to $27,222,061 as at December 31, 2017. The increase is primarily attributable to increase in property, plant and equipment associated with the development of grain and fertilizer handling facility projects.

Current Liabilities are $1,978,764 for the Period as compared to $1,584,236 as at December 31, 2017. Increase of $394,528 is largely due to an increase in payables related to **PLT**.

Long Term Liabilities increased from $56,672 in December 31, 2017 to $8,135,740 at end of Period. The additional debt is as a result of financing received in **Maxx Group** for project construction.
