

## News Release

For Immediate Release

June 15, 2020

### **HTC Pureenergy Inc. (“HTC Extraction Systems”) announces financial results for fiscal year ending December 31, 2019**

**Regina, Saskatchewan - *HTC Extraction Systems*** (the “Corporation” and/or “HTC”) (HTC: TSX-V) (OTCQB:HTPRF) today announced its audited financial results for the fiscal year ending December 31, 2019 (“Year”).

**HTC Extraction Systems** and its subsidiaries have developed proprietary extraction and purification systems, that have been designed to extract from biomass, liquids and gas and for the distillation and purification of ethanol, ethanol and hydrocarbon-based solvents, used for this extraction in the Hemp/CBD biomass and clean energy industries.

HTC's Hemp/CBD biomass business strategy includes sourcing industrial hemp cultivated in compliance with applicable laws for the extraction and purification of hemp biomass. This business strategy is based on, in addition to other things, establishing infrastructure, acquiring equipment for extraction of CBD and other phytocannabinoids from industrial hemp and obtaining all necessary regulatory approvals and licensing related to the extraction and processing of CBD, CBG, and CBN.

By implementing its historical skillsets, process design and standard operating procedures (“SOPs”), and upon receipt of required licensing, HTC aims to become a North American leader in hemp cannabinoid extracting and refining for the emerging ingredient and wellness market, HTC will utilize its intellectual property and experience gained as a recognized industry leader in ethanol-based extraction and purification. In order to accomplish its objectives, the Corporation intends to leverage its relationships with successful farming leaders and draw on SOPs, best practices in genetics, fertility and crop protection and experience in ingredient sales with multi-year contracts.

HTC has purchased extraction and formulation equipment for hemp biomass processing, extraction, formulation and refining, for utilization in Regina.

HTC has completed its Phase 1 construction of its 27,000 square foot hemp biomass processing and storage facility adjacent to the 19,000 square foot laboratory and extraction Facility, to be utilized for the storing, processing and preparation of extraction-ready biomass and the processing of hemp fibre and hurd, as an ingredient for the materials construction industry, and as a substrate for the plant nutrition industry.

Kase Farma Inc. (“Kase Farma”), HTC’s wholly owned subsidiary, located in Ceres, California, has received and commissioned, in part, equipment that in totality, is capable of processing and distilling 12,000 lbs. per day of dried biomass at its “IPElite Extraction” operation in California. Kase Farma’s “IPElite Extraction” operations are part of the Starling Brands Inc. - owned 22,000-square-foot overall facility.

Kase Farma has launched Kase One for the wholesale and retail markets under the theme of “*One Life; One Plant*” with the intention of providing the consumer with full transparency as to where their products have

come from and how they were produced, bringing accountability and verified quality to the cannabinoid industry.

**HTC's** clean energy business strategy is centred on advanced Extraction and Purification Technologies with a focus on environmental sustainability. The acceptance of climate change and the social license that corporations are moving towards, are upon us in force. A reduced environmental footprint, through the use of Reclaim, Recycle and Reuse extraction and purification systems, has become effectively a currency of business, a vehicle for penalty and taxation, and a statement to shareholders who expect environmental responsibility from the companies they invest in. The natural gas industry has taken on a new challenge of gas cleanup of CO<sub>2</sub>, SO<sub>2</sub> and other contaminants, while ensuring that the ethanol-based solvents and the glycols that are used in the clean-up process are purified, reclaimed, recycled and reused, while at the same time providing a significant cost reduction to the customer.

HTC's **Delta Purification™** technology allows the customer to recycle and reuse the existing ethanol used in the CBD extraction process and ethanol, glycol and other solvents used for clean energy processing, while managing and reducing waste losses, reducing costs and shrinking the environmental footprint. HTC's **Delta Purification™** division is delivering results, as the energy industry, the biomass Hemp/CBD extraction industry, and other specialty industries have joined the *re3* revolution: **Reclaim, Recycle, Reuse.**

**“Reclaim, Recycle, Reuse”** is more than a tag line for our company, *WE ARE RECOGNIZED LEADERS* in delivering **Advanced Extraction and Purification Technologies.**

## **Financial Results**

Selected financial information of **HTC** is summarized below. Financial results for **HTC** have been prepared in accordance with International Financial Reporting Standards.

	<u>Fiscal Year Ending December 31, 2019</u>	<u>Fiscal Year Ending December 31, 2018</u>
Total Assets	\$46,739,123	\$34,070,462
Current Liabilities	\$5,042,569	\$4,765,065
Long Term Debt	\$12,312,926	\$7,665,319
Revenue	\$2,415,438	\$861,424
Expenses (before amortization)	\$4,262,628	\$3,315,950
Operational loss before amortization	\$(1,847,190)	\$(2,454,526)
Amortization	\$2,253,728	\$1,056,999
Loss from operations	\$(4,100,918)	\$(3,511,525)
Net Loss	\$(5,518,038)	\$(4,019,633)
Common Shares outstanding as of year end	101,363,741	32,413,741
Weighted Average Shares Outstanding - Basic	65,542,508	32,246,531
Profit (Loss) per Common Share (weighted average)	\$(0.08)	\$(0.009 )

*\*(Loss) per common share is not presented, on a fully diluted basis as the effect of common share options would be anti-dilutive.*

Total assets for the Year were \$46,739,123 compared to \$34,070,462 as at December 31, 2018. The increase is primarily attributable to increases in cash, prepaids expenses, accounts receivables and other receivables, deposits and an increase in property, plant and equipment.

Current liabilities are \$5,042,569 for the Year as compared to \$4,765,065 as at December 31, 2018. The increase is due to draws on the operating line of credit in order to support capital expenditures net of settlement of other current obligations.

The Corporation reported long term liabilities for the Year of \$12,312,926 (December 31, 2018 – \$7,665,319). Long term liabilities increased to fund construction projects and other expansion initiatives.

The net loss for the Year is \$(5,518,038) compared to \$(4,019,633) as at December 31, 2018 for a difference of \$(1,498,405) which is primarily due to a one-time severance expense of \$2,116,846 and increased amortization on newly built capital assets of \$2,253,728.
